Please run the following command should you need to provide a list of the IBM Licensed Program Products that are installed on your iSeries.

DSPSFWRSC *PRINT
This command will produce a spooled file.

CALL QSFWINV PARM(*PRINT)

This command has the added bonus that it will output your license keys & the Processor Group.
This command will create a spooled output (WRKJOB option 4)
Use Client Access to copy the spooled output to a PC .TXT file & email to your support contact.
